INTRODUCTION

Sacred Heart College, Thevara, has introduced the e-governance to enhance good governance through transparency, participation and accountability from the stakeholders. The Enterprise Resource Planning (ERP) of the College, Thevara, provides various privileges to its stakeholders. Two major fields under e-governance are e-administration and e-services. E-administration uses the ICT for information process and decision making by the administrators. E-services provides various service facilities.

Sacred Heart College was granted autonomous status by UGC, New Delhi in the academic year 2014-2015. This gave impetus to the implementation of complete e-governance program in different areas. The academic year 2014-2015 saw a great leap in this direction. A company called **Knowledge Pro** was selected for implementing e-governance in all domains of college administration. In the academic year 2015-2016, advancements were made by automation using the **Knowledge Pro** software in the key domains of student attendance management, continuous assessment records and examination management. A major shift in the e-governance policy was made in 2016-2017, by which IQAC was entrusted with task of exploring the possibilities of independent automation software.

In the light of the previous year decision to develop campus software, a set of experts were identified and a team was established under the leadership of Fr. Nijo Antony CMI, the campus system administrator. The campus software is named **SHARMS (SH Autonomous Resource Management System)**. The expert team held consultation with key administrators and all departments and finally arrived at a comprehensive plan for implementing total e-governance.

A new Server purchased for managing the on-line transactions.

The following improvements were made in the student admission and support and examination areas.
