

2. Comparative statement of Electricity Bills before and after the implementation of Energy conservation measures, attested by the Principal.

Tabulated statement of energy consumption before and after the commissioning of solar power plant is given below. The college is now producing more electrical energy than what is required.

Electricity Consumption -2021	
Month	Units
January	11116
February	13025
March	12038
April	2014
May	0
June	0

An on-grid solar power plant was installed and is now fully functional, since April 2021. At the moment the net energy consumption of the college stands at 0 kWh, as more energy is supplied to the grid, than what is consumed. Monthly energy consumption before and after the commissioning of solar power plant is given below. Evidently net power consumed has become 0 from about 11,500 units.
