

Stem Cell Donation Campaign-Aardra (06/08/2015)

The NSS unit of Sacred Heart College (Autonomous), Thevara organized the Aardra *Stem cell donation campaign* on 6th August 2015. The campaign was organized to spread awareness among the young people and motivate the youngsters to register as a donor. The campaign elaborated the procedures of stem cell donation as once the donors have given their consent, the sample was taken and sent to the laboratory for further procedures and finally the result was uploaded in their association portal. This provided possible matches for patients or needy people with hematological disorders. Students from various departments and clubs participated in the campaign. Majority of students were highly inspired and motivated by the real-life videos played on the occasion. The campaign was a highly successful one as a good number of students came forward voluntarily and had given their names for donation. The programme came to an end at 4.30 p.m. in the evening.

As a public initiative of Rithu '15, the annual cultural fest of TKM College of Engineering, a blood stem cell donation scheme has been planned to be conducted in various colleges across Kerala which are willing to participate.

"You Have The Power To Save A Life"

What Are Stem Cells?

Stem cells, found in the bone marrow, are undifferentiated cells which are capable of giving rise to indefinitely more cells of the same type, and from which certain other kinds of cells can arise by differentiation. They are building blocks which can grow into any normal cell of the body such as red blood cells, white blood cells or platelets.

Stem cell transplant is only done on finding a donor having stem cells that match that of the patient. The possibility of getting a genetic match is 1:20 million.

Every day, someone in India is diagnosed with some fatal blood disorder such as blood cancer, and there are over 100 fatal blood disorders. For many, a stem cell transplant is their last hope of life. By joining the Aardra Blood Stem Cell Donors Registry, you could give them that hope.

Once a match is found, blood is drawn from the donor and stem cells are harvested from this blood sample. These healthy stem cells are introduced into the blood of the patient and used to combat their diseases.

*"A Swab Of Your Cheek,
Can Give A Hope To Live"*

PROCEDURE TO BECOME A DONOR

Attend an awareness session	Fill up an application form	Buccal swab procedure	HLA typing

PROCEDURE FOR DONATION (If Match Found)

HLA confirmatory typing	Pre-screening	Mobilization (Neupogen injections for 5 days)	PBSC (Peripheral Blood Stem Cell) Donation (3-4 hours)

Harvested PBSC for treatment
