Adulthood

Early adulthood

- A **young adult** is generally a person in the age range of 20 to 39 (or 40)'.
- Erik Erikson: a stage where development is mainly focused on <u>maintaining relationships</u>.
- the healthiest time of life- generally in good health
- Strength and <u>physical performance</u> reach their peak from 20–35 years of age
- Women reach their peak <u>fertility</u> in their early 20's

• important choices regarding :marriage,

- family, work, and lifestyle
- Role Spouse/Bread winner/ Parent
- settling down: 'the establishment phase', involving 'what we would call *major life investments*—work, family, friends, community activities, and values.

Middle adulthood/ <u>Middle age</u> (40-60).

- Physical changes
- The maturing process is viewed as completed and gives way to the aging process.
- become more sensitive to diet, substance abuse, stress, and rest.
- Chronic health problems can become an issue
- Eye sight problems
- Hearing loss

- Height begins to diminish
- Osteoporosis
- reaction time slows
- Women between 48-55 experience <u>menopause</u>, which ends natural fertility.
- Changes occur to <u>skin</u> and <u>hair</u>.
- heart problems, <u>cancer</u>, <u>hypertension</u>, and <u>diabetes</u>

Social and personality characteristics

- Marital satisfaction
- Career satisfaction
- career changes- retirement
- re-examines their life by taking stock, and evaluating their accomplishments.
- More Morality conscious/religious
- Arranging marriage for children
- experience the death of one's parents

OLD AGE

OLD AGE

- Old age refers to ages nearing or surpassing the life expectancy of human beings, and is thus the end of the human life cycle.
- Euphemisms- old people (worldwide usage),
- seniors (American usage),
- senior citizens (British and American usage),
- older adults (in the social sciences),
- **the elderly**, and **elders** (in many cultures including the cultures of aboriginal people).

- The <u>World Health Organization</u> finds "no general agreement on the age at which a person becomes old."
- Most <u>"developed countries"</u> set the age as 60 or 65.
- inability to make "active contribution" to society
- <u>Erikson-</u> old age is the stage in which individuals assess the quality of their lives.
- Develop a feeling of integrity if deciding that their lives were successful
- a feeling of despair if evaluation of one's life indicates a failure to achieve goals.

Physical changes

- Decline in muscular strength, reaction time, stamina, hearing, distance perception, and the sense of smell
- weakened immune system.
- Chronic diseases- arthritis, heart disease,pressure,diabetics, cancer
- Bone and joint- "thinning and shrinkage
- <u>osteoarthritis</u> and <u>osteoporosis</u>

- Dental problems. Less <u>saliva</u> and less ability for <u>oral</u> <u>hygiene</u> in old age increases the chance of <u>tooth decay</u> and infection
- **Digestive system.** disorders such as difficulty in swallowing, inability to eat enough and to absorb nutrition, constipation and bleeding
- **Falls-** Every year, about one-third of those 65 years old and over half of those 80 years old fall. Falls are the leading cause of injury and death for old people.
- **Eyesight.** Diminished eyesight -the ability to locate objects / reading
- **Sexuality** remains important throughout the lifespan

Mobility impairment or loss

- Skin loses elasticity, becomes drier, and more lined and wrinkled.
- **Sleep** trouble holds a chronic prevalence of over 50% in old age and results in daytime sleepiness.
- Voice. vocal cords weaken and vibrate more slowly.
- This results in a weakened, breathy voice that is sometimes called an "old person's voice.

- Mental <u>disintegration</u> may also occur, leading to <u>dementia</u> or ailments such as <u>Alzheimer's disease</u>
- limited regenerative abilities and are more susceptible to disease, syndromes, and sickness than younger adults.
- The organic process of <u>ageing</u> is called <u>senescence</u>
- the medical study of the aging process is called <u>gerontology</u>,
- the study of diseases that afflict the elderly is called <u>geriatrics</u>.
