Academic Year 2018-19

Semester 1

	PROGRAMME OUTCOMES
PO1	**Critical Thinking:** Take informed actions after identifying the assumptions that frame our thinking and actions, checking out the degree to which these assumptions are accurate and valid, and looking at our ideas and decisions (intellectual, organizational, and personal) from different perspectives.
PO2	**Effective Communication:** Speak, read, write and listen clearly in person and through electronic media in English and in one Indian language, and make meaning of the word by connecting people, ideas, books, media and technology.
PO3	**Effective Citizenship:** Demonstrate empathetic social concern and equity centered national development, and the ability to act an informed awareness of issues and participate in civic life through volunteering.
PO4	**Environment and Sustainability:** Understand the issues of environmental contexts and sustainable development.
PO5	**Ethics**: Recognise different value systems including your own, understand the moral dimensions of your decisions, and accept responsibility for them.
PO6	**Global Perspective:** Understand the economic, social and ecological connections that link the world's nations and people.

PROGRAMME SPECIFIC OUTCOMES

COURSE OUTCOMES

CO1	Understand analytic function as a mapping on the plane, Mobius transformation and branch of logarithm.
CO2	Understand Cauchy's theorems and integral formulas on open subsets of the plane.
CO3	Understand the concept of homotopy and homotopic version of Cauchy's theorem and simply connectivity.
CO4	Understand how to count the number of zeros of analytic function giving rise to open mapping theorem and Goursat theorem as a converse of Cauchy's theorem.
CO5	Know about the kind of singularities of meromorphic functions which helps in residue theory and contour integrations.
CO6	Handle integration of meromorphic function with zeros and poles leading to the argument principle and Rouche's theorem.
CO7	Understand analytic function as a mapping on the plane, Mobius transformation and branch of logarithm.
