Criterion 3: Research, Innovations and Extension

In order to take forward the National IPR Policy and to enhance creativity, innovation, competitiveness and economic growth in India, it is imperative to harness IPR. With phenomenal growth of the Indian economy, it is vital that IPRs are generated in India. In order to safeguard and protect the IPRs of the country and to legally protect it from exploitation, people should be aware of the provisions and privileges provided by IPR. Inadequate knowledge about the rights of individuals to protect their ideas and innovations and the low awareness about the procedures involved in obtaining an IPR has hindered India's growth in Intellectual Property Rights. With the central and state governments' increased emphasis and focus on the start-ups and incubation initiatives, the country is likely to make a leap in innovative projects and products. As a higher educational institution is the storehouse of such innovative ideas, it is very relevant to hold an IPR programme for the students and faculty in the college.

The major objectives of the seminar are;

- ☐ Intellectual Property Rights in academic research ☐ Intellectual Property Rights: Procedures and Policies ☐ IPR management and commercialisation
- ☐ Cyberspace – Protection of IPR ☐ Drafting of patents and filing procedures
- ☐ Identification of patentability of research outcome ☐ Benefit of IPR
- ☐ Publishing and commercialisation of patents

Subject areas covered: Academic research and patent, possibilities and procedures, specifications, trademarks, geographical indicators, copyright, commercial aspects of intellectual rights, how to file IPR, case studies etc.
