Criterion VII: Institutional Values and Best Practices

7.1.3 Describe the facilities in the Institution for management of the following type of degradable and non-degradable waste

Waste Recycling System

Maintaining a clean environment sets a good example to students and it also encourages them to take part in environment management activities. The students of our college are actively involved in the environment cleaning activities of the campus. These activities are organized on a weekly/monthly basis with the help of service clubs of the college namely nature club, bhoomithrasena, NSS, HEAL etc.

Students are divided into different groups and are engaged in various cleaning activities. They gather all types of waste from the campus both recyclable and non-recyclable wastes. The non-recyclable waste materials like plastic carry bags, bottles, other plastic items etc., are gathered and treated separately.

The cleaning activities conducted in our colleges are providing a learning experience for students and also encourages them to make a bigger effort to maintain their environment. Cleanliness is incredibly important when it comes to cutting down on the spread of diseases in the college and also provides a comfortable learning environment.

Waste segregation into degradable and non-degradable materials as part of Campus cleaning

Waste Paper Shredders

The waste papers from Controllers office and from the college office are shredded and soled for recycling to the agency with which the College has MOU. The College uses two paper shredders, one in the main Office and other one at the Controller's Office.
